

Requirement: Expert Question Creators for Centre for Teacher Accreditation

Centre for Teacher Accreditation (CENTA) aims to empower teachers and catalyze teacher professional development through its CENTA Certification that will connect outstanding teachers and teacher candidates to great opportunities. CENTA was founded in 2014 by Ramya Venkataraman and Anjali Jain, both seasoned professionals with IIT- IIM backgrounds and 15 to 20 years of experience in global organizations such as McKinsey & Company and HCL.

CENTA's assessment for teachers includes multiple choice tests on select themes, especially the subject itself. Therefore, question creation is an on-going process at CENTA and we keep selectively adding to our pool of question creators. For 'subject' related questions, we also selectively work with students of the subject having in-depth conceptual understanding.

At this point, we are interested in adding to our question creators' pool in the following subjects: English language, Mathematics, Physics, Chemistry, Biology, History, Geography, Economics, Hindi language, Tamil language, Telugu language. In all cases, the question creators can select grade levels they want to focus on (i.e. standard I to V, VI to VIII or IX to XII).

This is a **paid part-time role**, where the person can work from his/her own location, as long as he/she is able to dedicate a few hours per week on a consistent basis. **High performers will also receive a Certificate of Appreciation and/or Letter of Recommendation from senior people at CENTA, and may get broader exposure based on interest.**

Please note that post resume submission, question creators will be selected on the basis of a rigorous process, including the creation of sample questions.

Question Creator Profile:

The typical profile of a question creator is someone with in-depth knowledge and conceptual understanding of the diverse topics in the chosen subject and strong analytical reasoning (important for multiple choice question design). Basic comfort with Excel and Word would also be important for the working process, though in-depth ability to use technology is not needed for the role.

If you are interested, please email your resume along with the section(s) and theme(s) in which your expertise lies to alena.mathew@centa.org. We will revert to you with the next steps on the selection.
