Entrepreneurship Summit 2017

Date: 8th and 9th March, 2017

The 2017 edition of the Entrepreneurship Workshop connected leaders of change in Bengal with successful and current entrepreneurs, scholars, and students. The workshop features talks, business competition presentations, and interactive workshops. Speakers cover diverse but closely linked topics, including the developing business environment in Bengal, insights gained from interactions between scholars and practicing entrepreneurs, and on organizational strategy and intelligence. Some of these sessions also include planned group discussion, allowing participants substantial scope to contest and debate old ideas and test new ideas. The business plan competition included not only a pitch presentation of a new idea, but also a follow up workshop on sustaining the idea in a world of complexity, dynamism, and turbulence. With these innovative additions to the programme, the Workshop presented opportunities for knowledge creation and dissemination. This benefitted practicing entrepreneurs as they are exposed to new ideas and solutions through interactions they can achieve with the invited panel of distinguished and experienced business leaders. Students benefit from the opportunity to integrate and apply their learning from University level coursework to intriguing business problems. In addition, the workshop aims to provide important networking opportunities for entrepreneurs, faculty members, and students.

Inaugural address given by Dr. Krishna Gupta; Keynote address given by Vipul Mathur, Founder, Big Basket.

Academia-Entrepreneurship Interface Dr. Saugato Ray, Professor, Strategic Management, Indian Institute of Management Calcutta Dr. Abhirup Chakrabarti, Distinguished Faculty Fellow of Strategy, Queen's University, Canada, Subhashis Dutt, Director, Modendra Dutt and Sons; Meet the Entrepreneurs: Part I Anirban Saha, Founder, Kolkata Bloggers Arjun Majumder, Founder, Aloha Holidays Soumendhra Bhattacharya, Founder, MAD About Drama; Meet the Entrepreneurs: Part II Sagar Daryani, Co-founder, WOW! Momo Abhirup Banerjee, Co-founder, GRIP Consulting, Sweet Handi Sandip Gajakas, Founder, The Shoe Laundry; Organizational Challenges Punam Bir Kasturi, Founder, Daily Dump; Anjan Chatterjee, Founder, Speciality Restaurants Limited, Business Plan competition

Outcome: The participants had an opportunity to meet and interact with the reputed and well-established entrepreneurs. The first hand interaction inevitably cleared many stigmas

attached to this rarely treaded career path. The strongly rooted job-oriented mindset was challenged as the participants clearly seemed to realize the autonomy through innovation that entrepreneurship could provide. The concept that entrepreneurship can be an excellent primary career choice rather than being a plan-B after failing to secure a job was welcomed heartily. The inspiration and motivation provided by the experts and the potential that they recognised in this young Bengal fired up many as they flooded the interactive session with a plethora of curious questions. Students from different institutes participated in the B-plan competition. The success of the competition was in the fact that it gave all a taste of real world way of handling business all the while being very competitive and enjoyable. To put into a nutshell, the programme was an immense success as it duly delivered its objective of instilling an entrepreneurial spirit in the minds of up and coming young minds who can disrupt entire industries if they are shown the right path and honed accordingly.

The past and future of microcredit

Date of Event: 8th January, 2021

On the 8th of April, 2021, the department of Economics of Presidency College had conducted a digital seminar titled 'The past and future of microcredit'. The event was supervised and coordinated by Professor Zakir Hussain of Department of Economics, Presidency University. Professor Jonathan Murdoch graced the event with his deep and insightful presentation on microfinance, its history and how it should be perceived. Prof. Jonathan Morduch is currently Professor of Public Policy and Economics at the Robert F. Wagner Graduate School of Public Service, University of New York. He is a development economist most well-known for his significant academic contributions to assessing the impact of microfinance since the early years of the movement. What started in Dhaka has grown into a revolutionary movement around the world especially in a booming economies like India and Bangladesh. Microfinance refers to the financial services provided to low-income individuals or groups who are typically excluded from traditional banking. Through simple anecdotes and factual and graphical evidences Prof. Murdoch illustrated selective takes on the past and future of microfinance all the addressing rural poverty with focus on homogeneous participation irrespective of gender, or economic class, participation of NGOs, along with talks of nutrition, health and education. Challenges of development policies like market failure, unreliable services, social business, harnessing the market to reach mass scale and deprivation of the poor communities due to lack of collateral assets were the cornerstones of the exhaustive webinar. Diminishing marginal returns to capital and small loans requiring high rates of interest for sustainability while keeping in mind the risks associated were graphically explained in layman terms. The webinar also focused on optimization of the profits while including all the sections of the population so that entrepreneurship from the grassroots and the economic growth of the nation can go hand in hand without hampering the profitability of the institutions. The concluding part of the talk had discussions on women empowerment; role of traditional money lenders and how education and skill development boosts profitability exponentially. The seminar ended on a positive note with the conclusion that future is quite bright for micro lenders and the how the structure is quite

helpful for consumer lending. There were question and answer sessions where the eager students expressed their doubts and confusions which were beautifully elaborated and addressed by Prof. Murdoch.

Prof. Jonathan Murdoch speaks on "The past and future of microcredit"

Market failure
Banks can't find a viable interest rate

The graph shows 'Expected profit' on the vertical axis and 'Interest rate' on the horizontal axis. A downward-opening parabola represents the profit function. The peak of the parabola is at interest rate R^* . A horizontal dashed line at $\pi^* < 0$ indicates that the maximum profit is negative, labeled as 'Not profitable'. A horizontal dashed line at $\pi = 0$ is also shown.

Webinar

A combination of threads

Target market

- Poor households as frustrated entrepreneurs
- Non-farm enterprise as a key investment need
- Women as reliable customers

Process and method

- Innovation to overcome moral hazard, adverse selection
- Justification for raising interest rates and creating microcredit as "business-like"

Rhetoric

- Group-lending as empowerment
- Debt as a path to emancipation

Webinar

Department of Economics, Presidency University
The past and future of microcredit (Prof. Jonathan Morduch:) on 8 January (Friday) 2021
Time: 7.30 PM IST (9.30 AM New York Time)

The Economics department of Presidency University has organized a virtual short course on Python. All interested are invited to join this enriching course scheduled from 30th of April to 15th of May, 2022.

Mousumi Saha

Head of the Department
Economics Department
Presidency University

Course on Python

Date: 30.4.2022 to 15.05.2022

A short course on Python under the supervision of Dr. Prithviraj Guha (Associate Professor, department of Economics) was organised by the department of Economics from 30.04.2022 to 15.05.2022. The University believes that delivery of a short course on course added immense value to the students' employability and research potential by exposing them to modern, data techniques early in their career. The department further believes that practicing data science techniques will inform and enrich the overall research environment and imbibe a sense of excitement and learning urge among all cohorts of the department's students and scholars. No less importantly, introduction to Python or similar other non-proprietary software enhances students skill portability. They become more prepared for picking up different other software later in their academic career whereas, the analytical techniques taught in this course will remain in other analysis platforms. The course was conducted online via Google Meet during the just concluded Even Semester, 2022 from April 30th to May 14th. Eighteen students out of twenty-five from the M.Sc. first year batch signed up for the course and also successfully completed it. The course involved interactive theoretical lectures as well as practical. Altogether 30 hours were devoted to lectures, practical work, group discussions

and assessment. Dr. Amit Kumar Das, Assistant Professor of Computer Science and Engineering at the

Institute of Engineering and Management, Kolkata was present throughout the event. Before joining academia, Dr. Das had worked for several years in leading Information Technology firms of the country at senior management roles. He obtained his doctoral degree from the University of Calcutta's AK Choudhury School of Information Technology. In addition to his teaching job, he consults regularly for several start-up firms and also the government of West Bengal.

Shri Austin Manindra Nath Ghosh Memorial Lecture

Date: 14.06.2022

A Welcome note & Overview lecture by Prof Arijit Ray, Head, Department of Geology, Presidency University heralded the start of the event. The Director of KDMIPE spoke on the significance of the birth anniversary celebration of Sri AMN Ghosh. Dr Sanjib Kumar Biswas, DSc, FNASc, FGS, Former Head of KDMIPE) (Broadcast) delivered a speech titled "Remembering legendary Sri AMN Ghosh. The AMN Ghosh Memorial Lecture was delivered by Dr Kaustav Nag, Chief General Manager, Block Manager of Upper Assam South Block in Assam and Assam Arakan Basin, ONGC. With a question answer session and Vote of thanks the programme drew to an end.

Lexically Logical: A Scientific Computational Workshop

Date of Event : 11th December, 2021

Over the years the education system has undergone a paradigm shift owing to massive advancements in technology and introduction of the same in the field of education. To keep up with the demands of modern academia students require some core training in this field. To enhance the technological prowess of the students of the university, a workshop titled “Lexically Logical: A Scientific Computational Workshop” was organized by Prof. Nilanjan Dasgupta of the Department of Geology, Presidency University on 11th of December, 2021. Extensive lectures on introduction to different layers of Computers were delivered. Detailed study about

system software like Operating System, purpose and functioning of Compiler, Pre-processor, Interpreter, device were delivered through exhaustive paper presentation. An interactive session at the end of the programme was also conducted where keen students question on various aspects to gain deeper insights on the topics.

Discover your e-Library

Date of Event: 20th September, 2019

Students that take part in library orientation programs to learn the following technical skills.

E-Learning and MOOCs:

Discover information about MOOC courses (Massive Open Online Courses). How to register for MOOCs through e-PG Pathshala , SWAYAM (Study Webs of Active Learning for Young Aspiring Minds), Vidya-mitra (Video self-learning e-Trutorial), Swayam Prabha, DTH educational channels devoted to telecasting high quality educational programmes, ILMS Learning Management service, course creation, Enrolment, Assignment & Assessment, Discussion forum, etc.

OER-Open Educational Resources:

Using open educational resources (OER) that are accessible and useful for their research are all skills that students pick up along the way OER initiatives in India..

Research Profiling and Scholarly networking & Academic Social Networking:

How researchers can generate their own unique IDs and automatically link all of their study output to the same ID. The ID facilitates researcher separation from one another and avoids issues brought on by name conflation (name changes, researchers with the same name, or various ways to write a person). Researcher IDs from Google Scholar, ORCID, Scopus Author IDs, VIDWAN ID, etc.

Reference Management Software:

Discover how to assess information sources by considering factors like authority, scope, and more. using reference management softwares like Mendeley, EndNote, ReadCube Papers, EasyBib.com, Zotero, and Article Galaxy Enterprise, as well as proper citation techniques. The handling of citations, downloading and storing full-text content, using Boolean operators.

Copyright & Anti-Plagiarism Softwares :

Copyright concerns and knowledge of plagiarism detection programmes like Turnitin, Ithenticate, and Urkund, among others, are crucial to take into account.

Search Techniques Using E-Databases and E-Journals :

To know about several search techniques, including advanced search, affiliations search, author search, and document search. Use several databases, such as Scopus Database, Web of Science, Project Muse, IndiaStat, JSTOR, Sage Adam Mathew Collection, Nineteenth Century Collection online from Proquest etc. to improve the interface of the languages and the results. They become self-independent in search of information resources in the libraries

Web 2.0 :

Web 2.0 It makes reference to the newest generation of web-based communities and services, which emphasis user engagement, collaboration, and knowledge sharing. Some of its applications include wikis, folksonomies, blogs, and social networking sites; these mediums encourage user-generated content and online social interaction.

User orientation is all about imparting training to the students so that they may use the resources and services of a library efficiently and independently for attaining their goals and for lifelong learning.

Discovering and Managing E-Online Learning Resources

Date: 27.04.2018

Searching relevant authoritative scholarly information precisely on Web is both an art and science. There are thousands of multiple sources scattered across the web aiming to provide different kinds of information like Bibliographic Information, Full text research articles, Open Educational Resources (OER), Patent Information etc. Since different types of databases use different technology and search interface, effective searching on a particular databases or search engine needs technological knowledge about that particular search engine or the databases. Also search strategy and query string formulations for databases and search engines differ greatly. Further, managing search history and organising relevant retrieved information requires technological skills and advanced knowledge of technological tools like Zotero, Mendeley, Google drive, etc. Moreover, research analytics tools and Altmetrics tools are important parts of research life to enhance research visibility and to gain insights on a particular research area. This workshop thus aimed to provide knowledge and empower students and scholars in the following areas –

1. Identification of relevant sources to start a research work on a given topic.
2. Technological features and kinds of content aggregation of different databases and types of search engines and their features.
3. Advanced search formulation strategy and procedures including query string syntaxes for different kinds of databases like Scopus citation databases, patent databases, bibliographic databases, etc.
4. Maintaining search profiles and exporting search results by using cloud computing technology.
5. Organising required research papers using virtual reference management software like Zotero and Mendeley.
6. Use of virtual reference management software Mendeley and Zotero in real time research writing.

7. Creating shared network system using cloud computing technology for Co-operative research.
8. How to use Scopus based research analytic tools to understand research dynamics in a given domain.
9. Understanding the functioning of Altmetrics tools like Plum X for increasing research visibility.
10. Use of research profiling tools like ORCID, Scopus Author IDs to avoid naming ambiguities in research.
11. Effective use of Discovery service for retrieving required information.
12. Navigating Open Access Educational Resources using Library websites and important tools like National Digital Library of India, Networked Digital Library of Theses and Dissertations (NDLTD), etc.

Presidency University
Kolkata

Library Orientation program

Date: 10th to 19th September, 2018

Library Orientation Programme In order to help students become familiar with the library setting and its resources. The University Library hosts a library orientation at the start of each year. This programs goal is to better educate new members with the library resources, services, and policies so they can utilise the library services to their fullest potential. Libraries utilise orientation as part of their marketing strategy to inform both current and new users about the resources and services provided by the University library. Library orientation is all about imparting training to the students so that they may use the resources and services of a library efficiently and independently for attaining their goals and for lifelong learning. Students that take part in library orientation programmes to learn the following technical skills. E-Learning and MOOCs Discover information about MOOC courses (Massive Open Online Courses). How to register for MOOCs through e-PG Pathshala , SWAYAM (Study Webs of Active Learning for Young Aspiring Minds), Vidya-mitra (Video self-learning, e-Trutorial, Swayam Prabha, DTH educational channels devoted to telecasting high quality educational programmes, ILMS Learning Management service, course creation, Enrolment, Assignment & Assessment, Discussion forum, etc OER-Open Educational Resources Using open educational resources (OER) that are accessible and useful for their research are all skills that students pick up along the way OER initiatives in India. Research Profiling and Scholarly networking & Academic Social Networking how researchers can generate their own unique IDs and automatically link all of their study output to the same ID. The ID facilitates researcher separation from one another and avoids issues brought on by name conflation (name changes, researchers with the same name, or

various ways to write a person). Researcher IDs from Google Scholar, ORCID, Scopus Author IDs, VIDWAN ID, etc.

Reference Management Software Discover how to assess information sources by considering factors like authority, scope, and more using reference management softwares like Mendeley, EndNote, ReadCube Papers, EasyBib.com, Zotero, and Article Galaxy Enterprise, as well as proper citation techniques. The handling of citations, downloading and storing full-text content, using Boolean operators. Copyright & Anti-Plagiarism Softwares Copyright concerns and knowledge of plagiarism detection programmes like Turnitin, Ithenticate, and Urkund, among others, are crucial to take into account. Search Techniques Using E-Databases and E-Journals to know about several search techniques, including advanced search, affiliations search, author search, and document search. Use several databases, such as Scopus Database, Web of Science, Project Muse, IndiaStat, JSTOR, Sage Adam Mathew Collection, Nineteenth Century Collection online from Proquest etc. to improve the interface of the languages and the results. They become self-independent in search of information resources in the libraries Web 2.0. Web 2.0 It makes reference to the newest generation of web-based communities and services, which emphasis user engagement, collaboration, and knowledge sharing. Some of its applications include wikis, folksonomies, blogs, and social networking sites; these mediums encourage user-generated content and online social interaction.

Webinar On "Covid-19 Pandemic: Today And Tomorrow" In Collaboration With Multitrophic Interaction And Biocontrol Research Laboratory (Mibrl), Department Of Life Sciences, Presidency University, Kolkata

Date of Event : 30th September , 2020

Living up to its proactive nature and untiring efforts to bring about a positive impact, the National Service Scheme(NSS) wing of the Presidency University, Kolkata had organised a Webinar titled 'COVID-19 Pandemic: Today and Tomorrow' in collaboration with Multitrophic Interactions and Biocontrol Research lab of Dr. Puja Ray, Assistant Professor of the Department of Life Sciences, Presidency University, Kolkata. The digital seminar, which was held on 30th September, 2020, aimed at exploring and discussing the biological and multidisciplinary aspects of the global catastrophe while trying to provide holistic approaches to tackle the grave problems and mitigating the risks associated with it. The list of learned speakers who made the programme an unprecedented success included Professor Sunita Srinivas (Rhodes University, Republic of South Africa) Dr .Sugopa Sengupta(Assistant Professor, Department of Life Sciences, Presidency University), Dr. Sutapa Saha(Assistant Professor, Department of Life Sciences, Presidency University) and Dr. Asok Sanyal(Chairman of West Bengal Biodiversity Board). Dr. Sumita Saha(Dean of the Humanities and Social Sciences and Coordinator of NSS cell), Dr. Mery Biswas(Associate Professor, Department of Geography, Presidency University) and Dr. Shilpa Shaw(Associate Professor, Department of Political Science, Presidency University) who are active members of the NSS unit of the university also provided their unbound assistance to successfully executed the webinar. Dr. Puja Ray(Assistant Professor, Department of Life Sciences, Presidency University), the convenor of the programme concluded the Webinar with a vote of thanks. Objectives of the Webinar: The guiding agenda of the seminar can be summed up in seven points as established by Dr. Srinivas, the introductory speaker: Acknowledging and taking advantage of the demographic dividends of India due to the youth constituting the lion's share of the Indian population. India's median age of 26.7 years is the youngest in the world, therefore better equipped in developing immunity against the Corona virus and overcoming the onslaughts of COVID-19 induced health complications. A 72% net literacy rate on top of that would further improve the

nation's chances of thriving and emerging as a global winner despite the dismal pandemic. Identifying key resources available, playing to our strengths and developing skill sets-a weakness that must be promptly dealt with. As young people focus must be on curbing the spread of the virus through various means. Identifying roles of global and local organizations and striving for establishing a synergy between them for a better future. Equally emphasising on coping up with mental strain due to the pandemic-induced boredom, depression, fear, frustration, negativity and the like. Stigma-centred fear must also be given attention. Focusing on the greater future and not settling for a myopic perception of success establishing a global preparedness monitoring board that is vigilant and industrious. Monitoring the consumption habits by rejecting processed food and prioritising vegetables and fruits and adding physical activities to daily regime. Refusing alcohol intake and reduction tobacco consumption was also highlighted. Dr. Sugopa Sengupta shared her views on the impact of PPE on healthcare workers and the environment. She talked about how India had started from scratch and at one point was producing 4.5 lakh PPE kits every single day and emerging as a top exporter. PPEs had taken a great toll and had caused immense discomfort to frontline workers and healthcare workers alike. Customised PPE kits had somewhat alleviated them. PPEs becoming a big source of dangerous biomedical waste has been managed by the introduction of biodegradable kits. Recycling shredded PPE kits in a pyrolysis thermal reactor and making a fuel with similar properties to that of fossil fuels is also a revelation as highlighted by Dr. Sengupta. Dr. Sutapa Saha talked on the science of 'Coronavirus and COVID-19' while busting myths, curbing misinformation and half facts. She also enlightened the participants on the criticality and fatality of the virus. T3 programmes (Testing, Tracking and Tracing) and the role of Arogya Setu App and the progress of different international and indigenous vaccines were some other topics she elaborated upon. The efforts put into the Webinar and the literary discussions was well lauded by Dr. Asok Sanyal who extended his gratitude and sincerity as the two and a half hour session ended with a vote of thanks by Dr. Puja Ray.

Green Revolution and Environmental Issues

Date: 31.01.2018

The Indian Green Revolution of 1962 under the initiatives of Dr. M.S. Swaminathan was one of those watershed events in the history of India that had permanently changed the course of the nation. It transformed India from a grain scarce country to a name in top ten largest exporters of wheat in the world. It was this movement that had made the agricultural backbone of the country so strong that the whole world market is much influenced with the least of fluctuations in the Indian market. But with all the prosperity and development came a train of tailing problems. Out of all the problems, irregular distribution of the benefits (thus profits) throughout the country and a grave impact on the environment due to heavy usage of fertilizers and pesticides are the two major drawbacks. The NSS cell of Presidency University, Kolkata had organized a seminar titled "Green Revolution and Environmental Issues" on 31st January, 2018. The lecture was delivered by Dr. Nasim Aktar, Asst. Professor, Department of Geography, Presidency University. There was a brief message to the society on how the impact of the Green Revolution has greatly affected the health by increasing land and water pollution in the urban and rural areas alike.

Special camp on Malnutrition and Food habits

Date of Event : 23rd March – 29th March, 2019

A world without women is highly unthinkable. Progress is impossible in a patriarchal social structure, where women worldwide have to struggle ceaselessly to attain parity with men in all fields. Beyond the biological and evolutionary role she performs, a woman's contribution to world harmony is undisputable. A feminine approach to a problem can be the difference between a solution and a disaster. History holds testimony to such claims. It is high time that we acknowledge that our mothers, our sisters, our daughters, and the derogatorily called 'the other' sex deserve much better than rights deprivation and misogyny. This can only happen if women are empowered and made aware of their rights. With such a noble cause kept in mind and to commemorate the event of international Women's day, the NSS unit of the Presidency University had organized a seven days special camp on women empowerment. The main focus of the camp was to aware the local women about different social issues with a brief outline of empowerment. The detailed report of the event is highlighted as under: 1. Day 1 (8/3/2019): The first day of the camp started with a brief by Smt. Shilpa Shaw, Programme Officer, NSS Unit regarding the programme to be held. On the first day of the camp, an in-house talk as well as a poster presentation was organized wherein the latter was participated by the NSS volunteers. The primary theme of this presentation was women empowerment and its various facets. It may be added here that the aforesaid has been the central theme of this special camp. On this day we had also found the participation of eighteen residents of the adopted community, comprising of the housewives and other female members. On this day we had a series of paper presentations based on women rights as well as their economic empowerment. The discussion highlighted on empowering women thorough economic self-sufficiency which may often be done with the organization of various self-help groups and better policy initiatives both at the state and the national level. 2. Day 2 & 3 (9/3/2019 & 10/3/2019): The second and third day of the camp, the NSS volunteers visited the adopted community whereupon they had conducted a survey on the socio-economic condition of the community members. The volunteers further sensitized the

local people about the importance and the need for empowering women and other vulnerable members. On these days, there was detailed interaction session among the members as well as the volunteers, thus we hope that the community can understand the importance and be aware of the issue of empowerment. 3. Day 4 (11/3/2019): on the fourth day of the camp, a free health check-up was organized where community members of Keshab Chandra Sen Street joined. This health check-up was conducted by Dr Jadab Chatterjee, Professor of Anatomy, Medical College and Hospital. Herein the concerned had also prescribed medicines for the patients.

**Menstrual Hygiene Workshop (Menstrual Hygiene Awareness Session
Conducted By Nss Cell, Presidency University In Collaboration With
Unicharm, India)**

Date of Event : 14TH August, 2020

Living up to its proactive nature and untiring efforts to bring about a positive impact, the national service scheme(nss) wing of the presidency university, kolkata had organised a webinar titled 'covid-19 pandemic: today and tomorrow' in collaboration with multitrophic interactions and biocontrol research lab of dr. puja ray, assistant professor of the department of life sciences, presidency university, kolkata. the digital seminar, which was held on 30th September,2020, aimed at exploring and discussing the biological and multidisciplinary aspects of the global catastrophe while trying to provide holistic approaches to tackle the grave problems and mitigating the risks associated with it. The list of learned speakers who made the programme an unprecedented success included professor Sunita Srinivas(Rhodes University, Republic of South Africa) Dr . Sugopa Sengupta(Assistant Professor, Department of Life Sciences, Presidency University), Dr. Sutapa Saha(Assistant Professor, Department of Life Sciences, Presidency University) and Dr. Asok Sanyal (Chairman of West Bengal Biodiversity Board). Dr. Sumita Saha(Dean of the Humanities and Social Sciences and Coordinator of NSS cell),Dr. Mery Biswas (Associate Professor, Department of Geography, Presidency University) and Dr. Shilpa Shaw(Associate Professor, Department of Political Science,Presidency University) who are active members of the NSS unit of the university also provided their unbound assistance to successfully executed the webinar Dr. Puja Ray(Assistant Professor, Department of Life Sciences, Presidency University), the convenor of the programme concluded the webinar with a vote of thanks.

Objectives of the webinar: the guiding agenda of the seminar can be summed up in seven points as established by Dr. Srinivas, the introductory speaker: acknowledging and taking advantage of the demographic dividends of India due to the youth constituting the lion's share of the indian population. India's median age of 26.7 years is the youngest in the world, therefore better

equipped in developing immunity against the corona virus and overcoming the onslaughts of COVID-19 induced health complications. A 72% net literacy rate on top of that would further improve the nation's chances of thriving and emerging as a global winner despite the dismal pandemic. Identifying key resources available, playing to our strengths and developing skill sets - a weakness that must be promptly dealt with. As young people focus must be on curbing the spread of the virus through various means. Identifying roles of global and local organizations and striving for establishing a synergy between them for a better future. Equally emphasizing on coping up with mental strain due to the pandemic-induced boredom, depression, fear, frustration, negativity and the like. Stigma-centered fear must also be given attention. Focusing on the greater future and not settling for a myopic perception of success establishing a global preparedness monitoring board that is vigilant and industrious. Monitoring the consumption habits by rejecting processed food and prioritising vegetables and fruits and adding physical activities to daily regime. Refusing alcohol intake and reduction tobacco consumption was also highlighted. Dr. Sugopa Sengupta shared her views on the impact of PPE on healthcare workers and the environment. She talked about how India had started from scratch and at one point was producing 4.5 lakh PPE kits every single day and emerging as a top exporter. PPEs had taken a great toll and had caused immense discomfort to frontline workers and healthcare workers alike. Customized PPE kits had somewhat alleviated them. PPEs becoming a big source of dangerous biomedical waste has been managed by the introduction of biodegradable kits. Recycling shredded PPE kits in a pyrolysis thermal reactor and making a fuel with similar properties to that of fossil fuels is also a revelation as highlighted by Dr. Sengupta. Dr. Sutapa Saha talked on the science of 'Coronavirus and COVID-19' while busting myths, curbing misinformation and half facts. She also enlightened the participants on the criticality and fatality of the virus. T3 programmes (Testing, Tracking and Tracing) and the role of Arogya Setu App and the progress of different international and indigenous vaccines were some other topics she elaborated upon. The efforts put into the Webinar and the literary discussions was well lauded by Dr. Asok Sanyal who extended his gratitude and sincerity as the two and a half hour session ended with a vote of thanks by Dr. Puja Ray.

Menstrual Hygiene Session – Breaking the blood taboo.

Aim of the Programme – To unfold the myth surrounded with Menstrual Hygiene.
To learn the importance of Menstrual Hygiene

- Objectives of the session** – a) To increase awareness among adolescent girls and women on Menstrual Hygiene
- To increase access to and use of quality sanitary napkins to adolescent girls.
 - To break the traditional taboo related with menstruation.
 - To ensure safe disposal of Sanitary Napkins in an environmentally friendly manner.

Report on Menstrual Hygiene

Menstrual Hygiene

Globally, approximately 52% of the female population (26% of the total population) is of reproductive age. Among these women and girls will menstruate each month for three to six days. In most parts of the world, it remains taboo and is rarely talked about and thus female fails to learn the important of menstrual hygiene.

Before, discussing about menstruation it is very important to understand the meaning of it, and unfold all the stereotypical notions attached to it. Girls typically start to menstruate during puberty or adolescence, typically between the ages of ten and sixteen. The menstrual cycle is the monthly series of changes a woman's body goes through in preparation for the possibility of pregnancy. Each month, one of the ovaries releases an egg — a process called ovulation. At the same time, hormonal changes prepare the uterus for pregnancy.

NSS cell in collaboration with Presidency University conducted a session with collaboration of Unicharm India on "Menstrual Hygiene Session" with collaboration of Unicharm India on 14th August 2020.

- The session started with an introduction about 'Menstruation' where a detailed presentation was held to first unroll the taboo and misconception it has in the society.

Common period taboos include the idea that women are impure, dirty, or sinful while they are menstruating. Some women are discouraged from touching or washing their genitals during their periods to eliminate the possibility that they might contaminate the water of a bathing area. Menstrual blood is the same as any other body fluid and bathing regularly prevents bacterial infections.

The elementary locus of the session was based on the following aspects: -

- Educating women about what is menstruation and how the menstruation cycle works (Female reproductive system and how it functions) – The menstrual cycle is usually around 28 days but can vary from 21 to 35 days. Each cycle involves the release of an egg (ovulation) which moves into the uterus through the fallopian tubes. Most women and girls suffer from period pains such as abdominal cramps, nausea, fatigue, feeling faint, headaches, back ache and general discomfort. They can also experience emotional and psychological changes (e.g., heightened feelings of sadness, irritability,

or anger) due to changing hormones. This varies from person to person and can change significantly over time.

- Potential risks to health of poor menstrual hygiene:-
 - a) Unclean sanitary napkins can lead to potential infection, urine infection is a common infection which occurs frequently on women.
 - b) Vaginal products are often harmful and not safe which causes bacterial infections.
 - c) Using tampons in certain conditions can lead to unusual vaginal discharges.
- Importance of good menstrual hygiene habits and how to maintain it. The session upheld the following points as the utmost fundamental habits which needs to be learned in order to maintain menstrual hygiene: -

- a) Changing sanitary napkin every 4-6 hours, beyond that period it is not good for health.
- b) Washing vagina properly, a mandatory and very useful method to keep the body clean.
- c) Avoid using soaps or vagina hygiene products which may be looks very attractive due to advertisements but, harmful for women.
- d) Disposing of the sanitary napkin properly, both health and environmental checks required for our society.
- e) Multiple method of sanitation is harmful, thus mono method should be followed by every woman.

- How Periods and meditation can work wonders in giving women a good reproductive and overall health --

Meditation during your period, in addition to any prescription drugs that may help reduce your PMS symptoms, can greatly help with pain and other PMS-related discomforts. Meditation can relieve bloating caused by water retention during menstruation, as well as menopausal symptoms like hot flashes and night sweats.

- Good practice in providing menstrual hygiene guidance to girls: -

- a) Train mothers, teachers and other trusted adults who can provide menstrual hygiene guidance to girls.
- b) Incorporate girls-only menstrual hygiene learning and discussion sessions in schools.
- c) Incorporate menstrual hygiene into the school curriculum.
- d) Establish youth clubs with girls' menstrual hygiene discussion groups.
- e) Use trained female instructors to run girls-only sessions at religious institutions, such as mosques, churches, temples, on providing menstrual hygiene information.

Special camp on Efficiency of rain water uses – A sustainable water management

Date: 25th to 31st August, 2018

The camp started with a documentary lecture by Prof. Jadav Chatterjee, Professor of Anatomy, Calcutta Medical College, entitled as 'Public health and water uses'. He discussed the different water borne diseases and general health check up was assisted of 30 patients. A series of lectures on cleanliness was conducted in the local club hall of the adopted area of Bagbazar. Dr. Sumita Saha and Dr. Mery Biswas, programme officers of NSS cell, Presidency University actively co-operated in the whole arrangement. 28.8.2018 – An in house programme was arranged to sensitize our NSS volunteers about the uses of rain water in domestic purposes. The lecture was given by Dr. Suranjana Banerji, Dept. of Geography, Presidency University. The detail discussion was concerned about the application of such ideas in micro scale and how the local people can adopt. 29.8.2018 – Our volunteers arranged a sit and draw competition among the children on 'Water pollution and efficiency of rain water'. One awareness lecture was also delivered by our volunteers to let them know about the uses of rain water harvesting in short scale during monsoon season. 30.8.2018 - The sixth day of the special camp was mainly focused on the cleanliness issues of the adopted area. As a part of sustainable water management, cleanliness of water resources is a basic requirement. Besides, a sustainable lifestyle relies on cleanliness on all aspects of daily life. NSS volunteers of Mathematics department, UG-3, Madhura Dutta, Sabarni Mondal and Sayani Hazra Choudhury, who previously took part in Swachh Bharat Summer Internship 2018, delivered lectures on Swachhata

(Cleanliness). The dwellers were enlightened about the cleanliness maintenance system of privileged cities

worldwide. They were advised to maintain neatness in their locality relevantly considering their local environmental perspectives. After the lecture series, an interactive session was arranged in which local women discussed their everyday's cleanliness issues with the NSS volunteers. The enthusiastic participation of women, children and teenagers made all the activities worthwhile. 31.8.2018 – An invited lecture was arranged by Dr. Panchali Majumder, Associate Professor, East Calcutta Girls College. There was an interaction session between the children and Dr. Majumder through which she tried to make them aware about the efficiency of rain water and some immerging issues about water scarcity. Secondly, there was a prize distribution ceremony among the children who participated in the drawing competition. Thirdly, following the prescriptions, medicines and zeolite solutions were distribute among the people.

Women led integrated solid waste management Programme

Date: 31.03.2017

The NSS cell, comprising of about 220 students had organised a Women led integrated solid waste management workshop in the slums of Bagbazaar Paschim Banga Matshya Unnyan Samity Bagbazaar, Kolkata-03, Ward No. 07 on 31st March, 2017. It is one of the two areas they had adopted. 40 students had participated in this programme. The workshop narrated the workings of the project funded by ITC and implemented by BITAN, a very much well-known NGO for its expertise with the issues related to Reproductive & Child Health Rights, and Solid & Liquid Resource Management. The entire programme consisted of two parts: technical session and interactive session. In the first session the students were shown a detailed documentary film on how actually the solid waste management programme is being diligently conducted by BITAN organization in the suburban and rural areas of West Bengal by local women since 2014. In a thriving metropolis like Kolkata, waste management becomes extremely essential to ensure the overall health and hygiene of the masses. Densely populated and unorganised areas like this particular locality can be breeding grounds for various sanitation related diseases, but on an optimistic note, with a few management measures and spread of awareness, areas like these can be great producers of organic manure. The film focused on several environmental issues and demonstrated the students how kitchen waste collected by the underprivileged women is being used to produce organic manure which is a healthier and safer solution to the chemical fertilizers. A Women self-help group was used to generate a pool of money from waste management which was further utilised to empower these underprivileged sections of the society. In the interactive session, the participating students were encouraged to put forward their views and opinions and play their part in planning how solid waste management programme can be initiated in the adopted slum of the NSS Cell of Presidency University. A campaigning at the adopted area of Bagbazar was also conducted on the 18th April, 2017 with the hope of spreading awareness and encouragement.

Swachha Bharat Summer Internship

Date: 16th June to 15th July, 2018

Under the observant supervision of Prof. Barun Roy Chowdhury(Department of Physics, Presidency University) and Prof. Sumita Saha(Dean of Humanities and Social Sciences, Presidency University), NSS Cell, Presidency University, the team of six NSS volunteers (Abhipsa Das, Madhura Dutta, Monalisa Paul, Moumita Maity, Sabarni Mondal, Sayani Hazra Choudhury) of Presidency University conducted one month long cleanliness activities as part of the Swachha Bharat Summer Internship 2018 in the village of Barbaria, Paschim Khilkapur, Barasat-I, North 24 Parganas, West Bengal on 16th June- 15th July 2018. This internship aimed at inculcating values of cleanliness and hygiene both at a personal as well as at a social level. The responsibilities shouldered throughout the programme would ensure that the students learn some core soft skills such as public speaking, management, persuasion, man-handling, leadership and discipline. Door to door visits, candid discussions with the villagers about their everyday sanitary habits and suggesting them accordingly, waste collection drives across the village and promoting the villagers to do the same, screening of cleanliness related movies to propagate education through entertainment and attracting a substantially large and diversely aged crowd, rallies on cleanliness through speaker announcements and placard display were the main activities of this internship. Local

people and students and teachers of the local primary and high school enthusiastically participated in all the activities. A drawing competition on the topic of cleanliness was organized in the primary and high school to encourage the younger sections to participate and be a part of the cause. NSS cell of Presidency University arranged prizes for the participants. The active and zealous presence of women and children of Barbaria village ensured that the programme had served its cause to create a vision for a brighter and cleaner future and hence it can be safely concluded that it was an immense success.

Special Camp on Women Empowerment

Date of Event: 8th March, 2019 -14th March, 2019

A world without women is highly unthinkable. Progress is impossible in a patriarchal social structure, where women worldwide have to struggle ceaselessly to attain parity with men in all fields. Beyond the biological and evolutionary role she performs, a woman's contribution to world harmony is undisputable. A feminine approach to a problem can be the difference between a solution and a disaster. History holds testimony to such claims. It is high time that we acknowledge that our mothers, our sisters, our daughters, and the derogatorily called 'the other' sex deserve much better than rights deprivation and misogyny. This can only happen if women are empowered and made aware of their rights. With such a noble cause kept in mind and to commemorate the event of international Women's day, the NSS unit of the Presidency University had organized a seven days special camp on women empowerment. The main focus of the camp was to aware the local women about different social issues with a brief outline of empowerment. The detailed report of the event is highlighted as under: 1. Day 1 (8/3/2019): The first day of the camp started with a brief by Smt. Shilpa Shaw, Programme Officer, NSS Unit regarding the programme to be held. On the first day of the camp, an in-house talk as well as a poster presentation was organized wherein the latter was participated by the NSS volunteers. The primary theme of this presentation was women empowerment and its various facets. It may be added here that the aforesaid has been the central theme of this special camp. On this day we had also found the participation of eighteen residents of the adopted community, comprising of the housewives and other female members. On that day we had a series of paper presentations based on women rights as well as their economic empowerment. The discussion highlighted on empowering women thorough economic self-sufficiency which may often be done with the organization of various self-help groups and better policy initiatives both at the state and the national level. 2. Day2&3(9/3/2019 &10/3/2019): The second and third day of the camp, the NSS volunteers visited the adopted community whereupon they had conducted a survey on the socio-economic condition of the community members. The volunteers further sensitized the local people about the importance and the need for empowering women and other vulnerable members. On these days, there was detailed interaction session among the members as well as

One-Day Students' Seminar on 'Society and Social Welfare: The Role of Youth'

Date of Event: 31st January, 2019

India boasts of the largest workforce in the world with the record lowest mean age of just 26.7 years. According to estimates, the nation of around 1.4 billion will be reaping benefits of its demographic dividend for the next 35 years. The youth is the biggest asset owned by any nation. Investment on them is bound to pay hefty dividends since they are the ones to decide the future of the the country's fate. Their contribution to the society is by no means small and therefore they must be nurtured and honed with utter care and concern. Presidency University throughout its glorious history of 200 plus years has always promoted the upliftment of the youth by inculcating in them values that education alone can never provide. India's greatest youth icon Swami Vivekananda was a student of this illustrious institution. With Swamiji's ideals in mind, the National Service Scheme(NSS) cell of Presidency University had organized a students' seminar titled 'Society and Social Welfare: The Role of Youth' on 31st January, 2019 in the seminar room of the Department of Sociology A.J C Bose Auditorium. The seminar was chaired by Prof. Mallarika Sarkar, Assistant Professor and Head, Department of Sociology, University of Calcutta. A total of 11 NSS volunteers from across various departments presented their thoroughly researched papers on various themes and sub-themes pertaining to the theme of the seminar. At the end of the session, the session chair invited questions from the audience which led to a lively interaction between the paper presenters and the other participants. Certificates of presentation were issued and refreshments were also provided. The seminar ended with a vote of thanks given by Prof. Shilpa Shaw, Programme Officer, NSS Unit, and Presidency University.

YOGA DAY

Date: 21.06.2022

With a trend of turning to the East in this hectic environment of global competitiveness the art of Yoga is gaining traction worldwide. The gift of a stressful lifestyle from the modern world can be neutralised to a great extent by the diligent practise of Yoga Asanas and Pranayam. To encourage people's physical, mental, and spiritual wellbeing the department of Political Science observed International Yoga Day on June 21st, 2022. The day was marked with educating students, scholars, staff and teachers on the advantages of yoga and how it may improve one's physical and mental health and happiness. Several training sessions each year for the students and faculty members were organised. Dr. Tushar Sil, a well-known Yoga expert was invited to be the chief external Yoga instructor for the event and to train the students. The Yoga Day celebrations were conducted in different places within the campus namely the open ground otherwise known as Presi Green, AJC Bose Auditorium and Seminar Hall in the department of Political Science etc, where all the students, scholars, and faculty members gathered to participate. The celebrations started with a short speech by the respected Dean of Students and the Deans of various academic disciplines, and NSS coordinator, highlighting the importance of yoga in one's life. This was followed by a group yoga session, where everyone performed various yoga asanas together. During the celebrations, the students who had received instruction in the weeks prior displayed their yoga skills. The entire audience was in astonishment as they exhibited a variety of poses including the Surya Namaskar, Pranayama, and several other asanas like Savasana(brings The Body to a Meditative State, reduces Blood Pressure and Anxiety, Improves Concentration and Memory), Pavanamuktasana(cures acidity problems, indigestion and constipation, gives

flat stomach, helps in diabetes, high blood pressure), Naukasana (strengthens the abdominal muscles, muscles

of the arms, thighs and shoulders, helps in regulating blood flow at sugar level, toughens muscles of neck, shoulder and the legs), Matsyasana (Stretches the chest and neck,relieve tension in the neck and shoulders,tones the parathyroid, pituitary and pineal gland), and Makarasana (Beneficial in all spine related problems,Very useful in asthma, knee pain, and other lungs related problem), among others. The youngsters garnered a standing ovation from the audience for their outstanding performance. The participants were then educated about the advantages of regular practicing yoga while taking it as fun. Discussions on how yoga may enhance physical health by enhancing flexibility, strength, and stamina, as well as how it helps to reduce stress, anxiety, and sadness were held as well. Also, the advantages of pranayama, which enhances lung function and general wellbeing, were explained to the participants. The Yoga Day events held at Presidency University were a huge success. It was able to raise awareness of yoga's benefits among students and staff members as an outcome of these activities. Also, demonstration of the abilities of the students who had received yoga instruction made a deep impact on everyone.

Swachha Bharat Summer Internship

Date: 16th June to 15th July, 2018

Under the observant supervision of Prof. Barun Roy Chowdhury (Department of Physics, Presidency University) and Prof. Sumita Saha (Dean of Humanities and Social Sciences, Presidency University), NSS Cell, Presidency University, the team of six NSS volunteers (Abhipsa Das, Madhura Dutta, Monalisa Paul, Moumita Maity, Sabarni Mondal, Sayani Hazra Choudhury) of Presidency University conducted one month long cleanliness activities as part of the Swachha Bharat Summer Internship 2018 in the village of Barbaria, Paschim Khilkapur, Barasat-I, North 24 Parganas, West Bengal on 16th June- 15th July 2018. This internship aimed at inculcating values of cleanliness and hygiene both at a personal as well as at a social level. The responsibilities shouldered throughout the programme would ensure that the students learn some core soft skills such as public speaking, management, persuasion, man-handling, leadership and discipline. Door to door visits, candid discussions with the villagers about their everyday sanitary habits and suggesting them accordingly, waste collection drives across the village and promoting the villagers to do the same, screening of cleanliness related movies to propagate education through entertainment and attracting a substantially large and diversely aged crowd, rallies on cleanliness through speaker announcements and placard display were the main activities of this internship. Local

people and students and teachers of the local primary and high school enthusiastically participated in all the activities. A drawing competition on the topic of cleanliness was organized in the primary and high school to encourage the younger sections to participate and be a part of the cause. NSS cell of Presidency University arranged prizes for the participants. The active and zealous presence of women and children of Barbaria village ensured that the programme had served its cause to create a vision for a brighter and cleaner future and hence it can be safely concluded that it was an immense success.

The past and future of microcredit

Date of Event: 8th January, 2021

On the 8th of April, 2021, the department of Economics of Presidency College had conducted a digital seminar titled 'The past and future of microcredit'. The event was supervised and coordinated by Professor Zakir Hussain of Department of Economics, Presidency University. Professor Jonathan Murdoch graced the event with his deep and insightful presentation on microfinance, its history and how it should be perceived. Prof. Jonathan Morduch is currently Professor of Public Policy and Economics at the Robert F. Wagner Graduate School of Public Service, University of New York. He is a development economist most well-known for his significant academic contributions to assessing the impact of microfinance since the early years of the movement. What started in Dhaka has grown into a revolutionary movement around the world especially in a booming economies like India and Bangladesh. Microfinance refers to the financial services provided to low-income individuals or groups who are typically excluded from traditional banking. Through simple anecdotes and factual and graphical evidences Prof. Murdoch illustrated selective takes on the past and future of microfinance all the addressing rural poverty with focus on homogeneous participation irrespective of gender, or economic class, participation of NGOs, along with talks of nutrition, health and education. Challenges of development policies like market failure, unreliable services, social business, harnessing the market to reach mass scale and deprivation of the poor communities due to lack of collateral assets were the cornerstones of the exhaustive webinar. Diminishing marginal returns to capital and small loans requiring high rates of interest for sustainability while keeping in mind the risks associated were graphically explained in layman terms. The webinar also focused on optimization of the profits while including all the sections of the population so that entrepreneurship from the grassroots and the economic growth of the nation can go hand in hand without hampering the profitability of the institutions. The concluding part of the talk had discussions on women empowerment; role of traditional money lenders and how education and skill development boosts profitability exponentially. The seminar ended on a positive note with the conclusion that future is quite bright for micro lenders and the how the structure is quite

Lexically Logical: A Scientific Computational Workshop

Date of Event : 11th December, 2021

Over the years the education system has undergone a paradigm shift owing to massive advancements in technology and introduction of the same in the field of education. To keep up with the demands of modern academia students require some core training in this field. To enhance the technological prowess of the students of the university, a workshop titled "Lexically Logical: A Scientific Computational Workshop" was organized by Prof. Nilanjan Dasgupta of the Department of Geology, Presidency University on 11th of December, 2021. Extensive lectures on introduction to different layers of Computers were delivered. Detailed study about

system software like Operating System, purpose and functioning of Compiler, Pre-processor, Interpreter, device were delivered through exhaustive paper presentation. An interactive session at the end of the programme was also conducted where keen students question on various aspects to gain deeper insights on the topics.

YOGA DAY

Date: 21.06.2022

With a trend of turning to the East in this hectic environment of global competitiveness the art of Yoga is gaining traction worldwide. The gift of a stressful lifestyle from the modern world can be neutralised to a great extent by the diligent practise of Yoga Asanas and Pranayam. To encourage people's physical, mental, and spiritual wellbeing the department of Political Science observed International Yoga Day on June 21st, 2022. The day was marked with educating students, scholars, staff and teachers on the advantages of yoga and how it may improve one's physical and mental health and happiness. Several training sessions each year for the students and faculty members were organised. Dr. Tushar Sil, a well-known Yoga expert was invited to be the chief external Yoga instructor for the event and to train the students. The Yoga Day celebrations were conducted in different places within the campus namely the open ground otherwise known as Presi Green, AJC Bose Auditorium and Seminar Hall in the department of Political Science etc, where all the students, scholars, and faculty members gathered to participate. The celebrations started with a short speech by the respected Dean of Students and the Deans of various academic disciplines, and NSS coordinator, highlighting the importance of yoga in one's life. This was followed by a group yoga session, where everyone performed various yoga asanas together. During the celebrations, the students who had received instruction in the weeks prior displayed their yoga skills. The entire audience was in astonishment as they exhibited a variety of poses including the Surya Namaskar, Pranayama, and several other asanas like Savasana(brings The Body to a Meditative State, reduces Blood Pressure and Anxiety, Improves Concentration and Memory), Pavanamuktasana(cures acidity problems, indigestion and constipation, gives

flat stomach, helps in diabetes, high blood pressure), Naukasana (strengthens the abdominal muscles, muscles

of the arms, thighs and shoulders, helps in regulating blood flow at sugar level, toughens muscles of neck, shoulder and the legs), Matsyasana (Stretches the chest and neck,relieve tension in the neck and shoulders,tones the parathyroid, pituitary and pineal gland), and Makarasana (Beneficial in all spine related problems,Very useful in asthma, knee pain, and other lungs related problem), among others. The youngsters garnered a standing ovation from the audience for their outstanding performance. The participants were then educated about the advantages of regular practicing yoga while taking it as fun. Discussions on how yoga may enhance physical health by enhancing flexibility, strength, and stamina, as well as how it helps to reduce stress, anxiety, and sadness were held as well. Also, the advantages of pranayama, which enhances lung function and general wellbeing, were explained to the participants. The Yoga Day events held at Presidency University were a huge success. It was able to raise awareness of yoga's benefits among students and staff members as an outcome of these activities. Also, demonstration of the abilities of the students who had received yoga instruction made a deep impact on everyone.

Webinar On “Covid-19 Pandemic: Today And Tomorrow” In Collaboration With Multitrophic Interaction And Biocontrol Research Laboratory (Mibrl), Department Of Life Sciences, Presidency University, Kolkata

Date of Event : 30th September , 2020

Living up to its proactive nature and untiring efforts to bring about a positive impact, the National Service Scheme(NSS) wing of the Presidency University, Kolkata had organised a Webinar titled ‘COVID-19 Pandemic: Today and Tomorrow’ in collaboration with Multitrophic Interactions and Biocontrol Research lab of Dr. Puja Ray, Assistant Professor of the Department of Life Sciences, Presidency University, Kolkata. The digital seminar, which was held on 30th September,2020, aimed at exploring and discussing the biological and multidisciplinary aspects of the global catastrophe while trying to provide holistic approaches to tackle the grave problems and mitigating the risks associated with it. The list of learned speakers who made the programme an unprecedented success included Professor Sunita Srinivas (Rhodes University, Republic of South Africa) Dr .Sugopa Sengupta(Assistant Professor, Department of Life Sciences, Presidency University), Dr. Sutapa Saha(Assistant Professor, Department of Life Sciences, Presidency University) and Dr. Asok Sanyal(Chairman of West Bengal Biodiversity Board). Dr. Sumita Saha(Dean of the Humanities and Social Sciences and Coordinator of NSS cell),Dr. Mery Biswas(Associate Professor, Department of Geography, Presidency University) and Dr. Shilpa Shaw(Associate Professor, Department of Political Science, Presidency University) who are active members of the NSS unit of the university also provided their unbound assistance to successfully executed the webinar. Dr. Puja Ray(Assistant Professor, Department of Life Sciences, Presidency University), the convenor of the programme concluded the Webinar with a vote of thanks. Objectives of the Webinar: The guiding agenda of the seminar can be summed up in seven points as established by Dr. Srinivas, the introductory speaker:· Acknowledging and taking advantage of the demographic dividends of India due to the youth constituting the lion’s share of the Indian population. India’s median age of 26.7 years is the youngest in the world, therefore better equipped in developing immunity against the Corona virus and overcoming the onslaughts of COVID-19 induced health complications. A 72% net literacy rate on top of that would further improve the

nation's chances of thriving and emerging as a global winner despite the dismal pandemic. Identifying key resources available, playing to our strengths and developing skill sets-a weakness that must be promptly dealt with. As young people focus must be on curbing the spread of the virus through various means. Identifying roles of global and local organizations and striving for establishing a synergy between them for a better future. Equally emphasising on coping up with mental strain due to the pandemic-induced boredom, depression, fear, frustration, negativity and the like. Stigma-centred fear must also be given attention. Focusing on the greater future and not settling for a myopic perception of success establishing a global preparedness monitoring board that is vigilant and industrious. Monitoring the consumption habits by rejecting processed food and prioritising vegetables and fruits and adding physical activities to daily regime. Refusing alcohol intake and reduction tobacco consumption was also highlighted. Dr. Sugopa Sengupta shared her views on the impact of PPE on healthcare workers and the environment. She talked about how India had started from scratch and at one point was producing 4.5 lakh PPE kits every single day and emerging as a top exporter. PPEs had taken a great toll and had caused immense discomfort to frontline workers and healthcare workers alike. Customised PPE kits had somewhat alleviated them. PPEs becoming a big source of dangerous biomedical waste has been managed by the introduction of biodegradable kits. Recycling shredded PPE kits in a pyrolysis thermal reactor and making a fuel with similar properties to that of fossil fuels is also a revelation as highlighted by Dr. Sengupta. Dr. Sutapa Saha talked on the science of ' Coronavirus and COVID-19' while busting myths, curbing misinformation and half facts. She also enlightened the participants on the criticality and fatality of the virus. T3 programmes (Testing, Tracking and Tracing) and the role of Arogya Setu App and the progress of different international and indigenous vaccines were some other topics she elaborated upon. The efforts put into the Webinar and the literary discussions was well lauded by Dr. Asok Sanyal who extended his gratitude and sincerity as the two and a half hour session ended with a vote of thanks by Dr. Puja Ray.

One-Day Students' Seminar on 'Society and Social Welfare: The Role of Youth'

Date of Event: 31st January, 2019

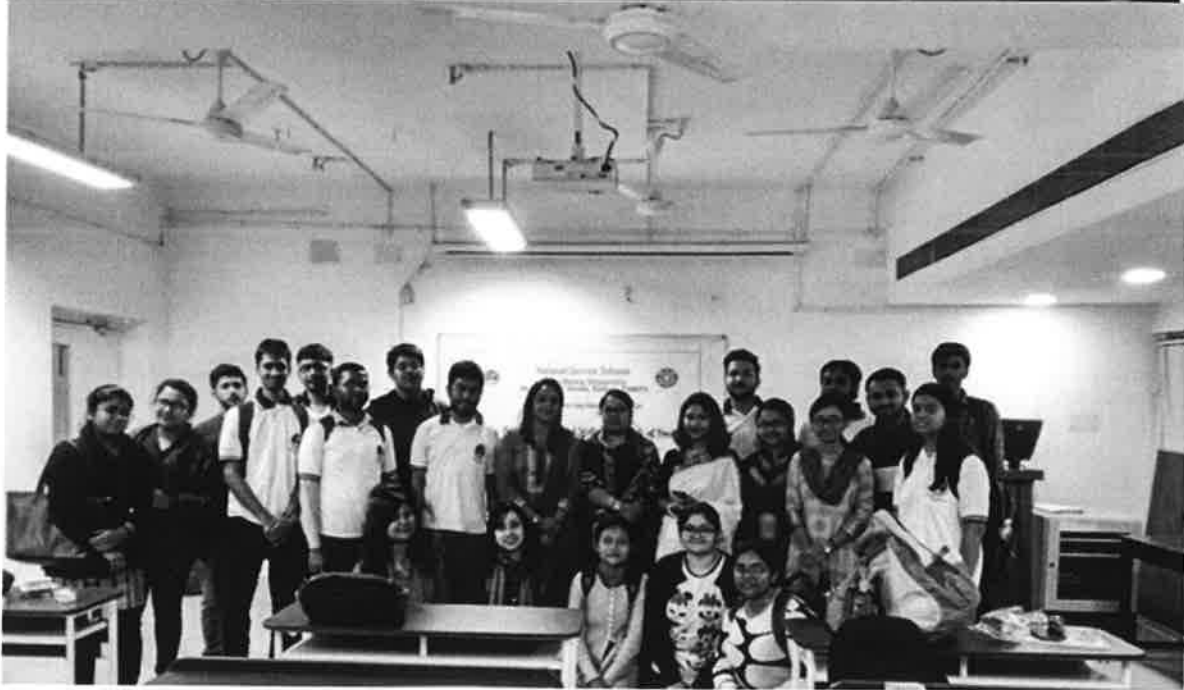

India boasts of the largest workforce in the world with the record lowest mean age of just 26.7 years. According to estimates, the nation of around 1.4 billion will be reaping benefits of its demographic dividend for the next 35 years. The youth is the biggest asset owned by any nation. Investment on them is bound to pay hefty dividends since they are the ones to decide the future of the the country's fate. Their contribution to the society is by no means small and therefore they must be nurtured and honed with utter care and concern. Presidency University throughout its glorious history of 200 plus years has always promoted the upliftment of the youth by inculcating in them values that education alone can never provide. India's greatest youth icon Swami Vivekananda was a student of this illustrious institution. With Swamiji's ideals in mind, the National Service Scheme(NSS) cell of Presidency University had organized a students' seminar titled 'Society and Social Welfare: The Role of Youth' on 31st January, 2019 in the seminar room of the Department of Sociology A.J C Bose Auditorium. The seminar was chaired by Prof. Mallarika Sarkar, Assistant Professor and Head, Department of Sociology, University of Calcutta. A total of 11 NSS volunteers from across various departments presented their thoroughly researched papers on various themes and sub-themes pertaining to the theme of the seminar. At the end of the session, the session chair invited questions from the audience which led to a lively interaction between the paper presenters and the other participants. Certificates of presentation were issued and refreshments were also provided. The seminar ended with a vote of thanks given by Prof. Shilpa Shaw, Programme Officer, NSS Unit, and Presidency University.

Women led integrated solid waste management Programme

Date: 31.03.2017

The NSS cell, comprising of about 220 students had organised a Women led integrated solid waste management workshop in the slums of Bagbazaar Paschim Banga Matshya Unnyan Samity Bagbazaar, Kolkata-03, Ward No. 07 on 31st March, 2017. It is one of the two areas they had adopted. 40 students had participated in this programme. The workshop narrated the workings of the project funded by ITC and implemented by BITAN, a very much well-known NGO for its expertise with the issues related to Reproductive & Child Health Rights, and Solid & Liquid Resource Management. The entire programme consisted of two parts: technical session and interactive session. In the first session the students were shown a detailed documentary film on how actually the solid waste management programme is being diligently conducted by BITAN organization in the suburban and rural areas of West Bengal by local women since 2014. In a thriving metropolis like Kolkata, waste management becomes extremely essential to ensure the overall health and hygiene of the masses. Densely populated and unorganised areas like this particular locality can be breeding grounds for various sanitation related diseases, but on an optimistic note, with a few management measures and spread of awareness, areas like these can be great producers of organic manure. The film focused on several environmental issues and demonstrated the students how kitchen waste collected by the underprivileged women is being used to produce organic manure which is a healthier and safer solution to the chemical fertilizers. A Women self-help group was used to generate a pool of money from waste management which was further utilised to empower these underprivileged sections of the society. In the interactive session, the participating students were encouraged to put forward their views and opinions and play their part in planning how solid waste management programme can be initiated in the adopted slum of the NSS Cell of Presidency University. A campaigning at the adopted area of Bagbazaar was also conducted on the 18th April, 2017 with the hope of spreading awareness and encouragement.

Course on Python

Date: 30.4.2022 to 15.05.2022

A short course on Python under the supervision of Dr. Prithviraj Guha (Associate Professor, department of Economics) was organised by the department of Economics from 30.04.2022 to 15.05.2022. The University believes that delivery of a short course on course added immense value to the students' employability and research potential by exposing them to modern, data techniques early in their career. The department further believes that practicing data science techniques will inform and enrich the overall research environment and imbibe a sense of excitement and learning urge among all cohorts of the department's students and scholars. No less importantly, introduction to Python or similar other non-proprietary software enhances students skill portability. They become more prepared for picking up different other software later in their academic career whereas, the analytical techniques taught in this course will remain in other analysis platforms. The course was conducted online via Google Meet during the just concluded Even Semester, 2022 from April 30th to May 14th. Eighteen students out of twenty-five from the M.Sc. first year batch signed up for the course and also successfully completed it. The course involved interactive theoretical lectures as well as practical. Altogether 30 hours were devoted to lectures, practical work, group discussions

Discover your e-Library

Date of Event: 20th September, 2019

Students that take part in library orientation programs to learn the following technical skills.

E-Learning and MOOCs:

Discover information about MOOC courses (Massive Open Online Courses). How to register for MOOCs through e-PG Pathshala , SWAYAM (Study Webs of Active Learning for Young Aspiring Minds), Vidya-mitra (Video self-learning e-Trutorial), Swayam Prabha, DTH educational channels devoted to telecasting high quality educational programmes, ILMS Learning Management service, course creation, Enrolment, Assignment & Assessment, Discussion forum, etc.

OER-Open Educational Resources:

Using open educational resources (OER) that are accessible and useful for their research are all skills that students pick up along the way OER initiatives in India..

Research Profiling and Scholarly networking & Academic Social Networking:

How researchers can generate their own unique IDs and automatically link all of their study output to the same ID. The ID facilitates researcher separation from one another and avoids issues brought on by name conflation (name changes, researchers with the same name, or various ways to write a person). Researcher IDs from Google Scholar, ORCID, Scopus Author IDs, VIDWAN ID, etc.

Reference Management Software:

Discover how to assess information sources by considering factors like authority, scope, and more. using reference management softwares like Mendeley, EndNote, ReadCube Papers, EasyBib.com, Zotero, and Article Galaxy Enterprise, as well as proper citation techniques. The handling of citations, downloading and storing full-text content, using Boolean operators.

Copyright & Anti-Plagiarism Softwares :

Copyright concerns and knowledge of plagiarism detection programmes like Turnitin, Ithenticate, and Urkund, among others, are crucial to take into account.

Discovering and Managing E-Online Learning Resources

Date: 27.04.2018

Searching relevant authoritative scholarly information precisely on Web is both an art and science. There are thousands of multiple sources scattered across the web aiming to provide different kinds of information like Bibliographic Information, Full text research articles, Open Educational Resources (OER), Patent Information etc. Since different types of databases use different technology and search interface, effective searching on a particular databases or search engine needs technological knowledge about that particular search engine or the databases. Also search strategy and query string formulations for databases and search engines differ greatly. Further, managing search history and organising relevant retrieved information requires technological skills and advanced knowledge of technological tools like Zotero, Mendeley, Google drive, etc. Moreover, research analytics tools and Altmetrics tools are important parts of research life to enhance research visibility and to gain insights on a particular research area. This workshop thus aimed to provide knowledge and empower students and scholars in the following areas –

1. Identification of relevant sources to start a research work on a given topic.
2. Technological features and kinds of content aggregation of different databases and types of search engines and their features.
3. Advanced search formulation strategy and procedures including query string syntaxes for different kinds of databases like Scopus citation databases, patent databases, bibliographic databases, etc.
4. Maintaining search profiles and exporting search results by using cloud computing technology.
5. Organising required research papers using virtual reference management software like Zotero and Mendeley.
6. Use of virtual reference management software Mendeley and Zotero in real time research writing.

Entrepreneurship Summit 2017

Date: 9th and 10th March, 2017

The 2017 edition of the Entrepreneurship Workshop connected leaders of change in Bengal with successful and current entrepreneurs, scholars, and students. The workshop features talks, business competition presentations, and interactive workshops. Speakers cover diverse but closely linked topics, including the developing business environment in Bengal, insights gained from interactions between scholars and practicing entrepreneurs, and on organizational strategy and intelligence. Some of these sessions also include planned group discussion, allowing participants substantial scope to contest and debate old ideas and test new ideas. The business plan competition included not only a pitch presentation of a new idea, but also a follow up workshop on sustaining the idea in a world of complexity, dynamism, and turbulence. With these innovative additions to the programme, the Workshop presented opportunities for knowledge creation and dissemination. This benefitted practicing entrepreneurs as they are exposed to new ideas and solutions through interactions they can achieve with the invited panel of distinguished and experienced business leaders. Students benefit from the opportunity to integrate and apply their learning from University level coursework to intriguing business problems. In addition, the workshop aims to provide important networking opportunities for entrepreneurs, faculty members, and students.

Inaugural address given by Dr. Krishna Gupta; Keynote address given by Vipul Mathur, Founder, Big Basket.

Academia-Entrepreneurship Interface Dr. Saugato Ray, Professor, Strategic Management, Indian Institute of Management Calcutta Dr. Abhirup Chakrabarti, Distinguished Faculty Fellow of Strategy, Queen's University, Canada, Subhashis Dutt, Director, Modendra Dutt and Sons; Meet the Entrepreneurs: Part I Anirban Saha, Founder, Kolkata Bloggers Arjun Majumder, Founder, Aloha Holidays Soumendra Bhattacharya, Founder, MAD About Drama; Meet the Entrepreneurs: Part II Sagar Daryani, Co-founder, WOW! Green Revolution and Environmental Issues

Date: 31.01.2018

The Indian Green Revolution of 1962 under the initiatives of Dr. M.S. Swaminathan was one of those watershed events in the history of India that had permanently changed the course of the nation. It transformed India from a grain scarce country to a name in top ten largest exporters of wheat in the world. It was this movement that had made the agricultural backbone of the country so strong that the whole world market is much influenced with the least of fluctuations in the Indian market. But with all the prosperity and development came a train of tailing problems. Out of all the problems, irregular distribution of the benefits (thus profits) throughout the country and a grave impact on the environment due to heavy usage of fertilizers and pesticides are the two major drawbacks. The NSS cell of Presidency University, Kolkata had organized a seminar titled "Green Revolution and Environmental Issues" on 31st January, 2018. The lecture was delivered by Dr. Nasim Aktar, Asst. Professor, Department of Geography, Presidency University. There was a brief message to the society on how the impact of the Green Revolution has greatly affected the health by increasing land and water pollution in the urban and rural areas alike.

Library Orientation program

Date: 10th to 19th September, 2018

Library Orientation Programme In order to help students become familiar with the library setting and its resources. The University Library hosts a library orientation at the start of each year. This programs goal is to better educate new members with the library resources, services, and policies so they can utilise the library services to their fullest potential. Libraries utilise orientation as part of their marketing strategy to inform both current and new users about the resources and services provided by the University library. Library orientation is all about imparting training to the students so that they may use the resources and services of a library efficiently and independently for attaining their goals and for lifelong learning. Students that take part in library orientation programmes to learn the following technical skills. E-Learning and MOOCs Discover information about MOOC courses (Massive Open Online Courses). How to register for MOOCs through e-PG Pathshala , SWAYAM (Study Webs of Active Learning for Young Aspiring Minds), Vidya-mitra (Video self-learning, e-Trutorial, Swayam Prabha, DTH educational channels devoted to telecasting high quality educational programmes, ILMS Learning Management service, course creation, Enrolment, Assignment & Assessment, Discussion forum, etc OER-Open Educational Resources Using open educational resources (OER) that are accessible and useful for their research are all skills that students pick up along the way OER initiatives in India. Research Profiling and Scholarly networking & Academic Social Networking how researchers can generate their own unique IDs and automatically link all of their study output to the same ID. The ID facilitates researcher separation from one another and avoids issues brought on by name conflation (name changes, researchers with the same name, or

various ways to write a person). Researcher IDs from Google Scholar, ORCID, Scopus Author IDs, VIDWAN ID, etc.

Reference Management Software Discover how to assess information sources by considering factors like authority, scope, and more using reference management softwares like Mendeley, EndNote, ReadCube Papers, EasyBib.com, Zotero, and Article Galaxy Enterprise, as well as proper citation techniques. The handling of citations, downloading and storing full-text content, using Boolean operators. Copyright & Anti-Plagiarism Softwares Copyright concerns and knowledge of plagiarism detection programmes like Turnitin, Ithenticate, and Urkund, among others, are crucial to take into account. Search Techniques Using E-Databases and E-Journals to know about several search techniques, including advanced search, affiliations search, author search, and document search. Use several databases, such as Scopus Database, Web of Science, Project Muse, IndiaStat, JSTOR, Sage Adam Mathew Collection, Nineteenth Century Collection online from Proquest etc. to improve the interface of the languages and the results. They become self-independent in search of information resources in the libraries Web 2.0. Web 2.0 It makes reference to the newest generation of web-based communities and services, which emphasis user engagement, collaboration, and knowledge sharing. Some of its applications include wikis, folksonomies, blogs, and social networking sites; these mediums encourage user-generated content and online social interaction.

**Menstrual Hygiene Workshop (Menstrual Hygiene Awareness Session
Conducted By Nss Cell, Presidency University In Collaboration With
Unicharm, India)**

Date of Event : 14TH August, 2020

Living up to its proactive nature and untiring efforts to bring about a positive impact, the national service scheme(nss) wing of the presidency university, kolkata had organised a webinar titled 'covid-19 pandemic: today and tomorrow' in collaboration with multitrophic interactions and biocontrol research lab of dr. puja ray, assistant professor of the department of life sciences, presidency university, kolkata. the digital seminar, which was held on 30th September,2020, aimed at exploring and discussing the biological and multidisciplinary aspects of the global catastrophe while trying to provide holistic approaches to tackle the grave problems and mitigating the risks associated with it. The list of learned speakers who made the programme an unprecedented success included professor Sunita Srinivas(Rhodes University, Republic of South Africa) Dr . Sugopa Sengupta(Assistant Professor, Department of Life Sciences, Presidency University), Dr. Sutapa Saha(Assistant Professor, Department of Life Sciences, Presidency University) and Dr. Asok Sanyal (Chairman of West Bengal Biodiversity Board). Dr. Sumita Saha(Dean of the Humanities and Social Sciences and Coordinator of NSS cell),Dr. Mery Biswas (Associate Professor, Department of Geography, Presidency University) and Dr. Shilpa Shaw(Associate Professor, Department of Political Science,Presidency University) who are active members of the NSS unit of the university also provided their unbound assistance to successfully executed the webinar Dr. Puja Ray(Assistant Professor, Department of Life Sciences, Presidency University), the convenor of the programme concluded the webinar with a vote of thanks. Objectives of the webinar: the guiding agenda of the seminar can be summed up in seven points as established by Dr. Srinivas, the introductory speaker:· acknowledging and taking advantage of the demographic dividends of India due to the youth constituting the lion's share of the indian population. India's median age of 26.7 years is the youngest in the world, therefore better

equipped in developing immunity against the corona virus and overcoming the onslaughts of COVID-19 induced health complications. A 72% net literacy rate on top of that would further improve the nation's chances of thriving and emerging as a global winner despite the dismal pandemic. Identifying key resources available, playing to our strengths and developing skill sets- a weakness that must be promptly dealt with. As young people focus must be on curbing the spread of the virus through various means. Identifying roles of global and local organizations and striving for establishing a synergy between them for a better future. Equally emphasizing on coping up with mental strain due to the pandemic-induced boredom, depression, fear, frustration, negativity and the like. Stigma-centered fear must also be given attention. Focusing on the greater future and not settling for a myopic perception of success establishing a global preparedness monitoring board that is vigilant and industrious. Monitoring the consumption habits by rejecting processed food and prioritising vegetables and fruits and adding physical activities to daily regime. Refusing alcohol intake and reduction tobacco consumption was also highlighted. Dr. Sugopa Sengupta shared her views on the impact of PPE on healthcare workers and the environment. She talked about how India had started from scratch and at one point was producing 4.5 lakh PPE kits every single day and emerging as a top exporter. PPEs had taken a great toll and had caused immense discomfort to frontline workers and healthcare workers alike. Customized PPE kits had somewhat alleviated them. PPEs becoming a big source of dangerous biomedical waste has been managed by the introduction of biodegradable kits. Recycling shredded PPE kits in a pyrolysis thermal reactor and making a fuel with similar properties to that of fossil fuels is also a revelation as highlighted by Dr. Sengupta. Dr. Sutapa Saha talked on the science of 'Coronavirus and COVID-19' while busting myths, curbing misinformation and half facts. She also enlightened the participants on the criticality and fatality of the virus. T3 programmes (Testing, Tracking and Tracing) and the role of Arogya Setu App and the progress of different international and indigenous vaccines were some other topics she elaborated upon. The efforts put into the Webinar and the literary discussions was well lauded by Dr. Asok Sanyal who extended his gratitude and sincerity as the two and a half hour session ended with a vote of thanks by Dr. Puja Ray.

Self-Defence Camp

Date: 10th - 12th July, 2017

The camp started with a documentary lecture by Prof. Jadav Chatterjee, Professor of Anatomy, Calcutta Medical College, entitled as 'Public health and water uses'. He discussed the different water borne diseases and general health check up was assisted of 30 patients. A series of lectures on cleanliness was conducted in the local club hall of the adopted area of Bagbazar. Dr. Sumita Saha and Dr. Mery Biswas, programme officers of NSS cell, Presidency University actively co-operated in the whole arrangement. 28.8.2018 – An in house programme was arranged to sensitize our NSS volunteers about the uses of rain water in domestic purposes. The lecture was given by Dr. Suranjana Banerji, Dept. of Geography, Presidency University. The detail discussion was concerned about the application of such ideas in micro scale and how the local people can adopt. 29.8.2018 – Our volunteers arranged a sit and draw competition among the children on 'Water pollution and efficiency of rain water'. One awareness lecture was also delivered by our volunteers to let them know about the uses of rain water harvesting in short scale during monsoon season. 30.8.2018 - The sixth day of the special camp was mainly focused on the cleanliness issues of the adopted area. As a part of sustainable water management, cleanliness of water resources is a basic requirement. Besides, a sustainable lifestyle relies on cleanliness on all aspects of daily life. NSS volunteers of Mathematics department, UG-3, Madhura Dutta, Sabarni Mondal and Sayani Hazra Choudhury, who previously took part in Swachh Bharat Summer Internship 2018, delivered lectures on Swachhata (Cleanliness). The dwellers were enlightened about the cleanliness maintenance system of privileged cities worldwide. They were advised to maintain neatness in their locality relevantly considering their local environmental perspectives. After the lecture series, an interactive session was arranged in which local women discussed their everyday's cleanliness issues with the NSS volunteers. The enthusiastic participation of women, children and teenagers made all the activities worthwhile. 31.8.2018 – An invited lecture was arranged by Dr. Panchali Majumder, Associate Professor, East Calcutta Girls College. There was an interaction session between the children and Dr. Majumder through which she tried to make them aware about the efficiency of rain water and some immersing issues about water scarcity. Secondly, there was a prize distribution ceremony among the children who participated in the drawing competition. Thirdly, following the prescriptions, medicines and zeolite solutions were distribute among the people.
